

Adept Group

ENGINEERING EXCELLENCE

Adept Group has assembled the top experts in the packaging industry to enable Pharmaceutical and Medical Device companies to:

Reduce Risk

Optimize Operations

Improve Sustainability

Increase Speed to Market

Decrease Costs

About Adept Group

A Global Team of **Experts**

ENGINEERING, CONSULTING, TALENT & DIGITAL SOLUTIONS

The Adept Group delivers best in class engineering, consulting, talent and digital solutions for the packaging world. With specialized teams focused on each of those areas, we work with the most iconic brands in the Pharmaceutical, Medical Device and Biopharmaceutical industries.

Consulting

Our specialized team of over 100 packaging engineering experts utilize our multi-disciplined methodology, diversity of expertise and expansive supplier network to identify, strategize, source and solve even the most complex challenges.

Deliverable: A scope of work detailing a solution that you can hire us to implement

Staffing & Recruiting

When you have a scope of work but need the resources to implement, our staffing model works perfectly. We leverage our diversity of expertise to provide whatever working model fits your need, from specific subject matter expertise, to implementation gurus or an entire packaging department. Some companies utilize our staffing model as a “try it before you buy it” when looking to hire full time employees.

Deliverable: A timecard

Cost & Quality Optimization

Our team of optimization specialists leverage our best in class tools, talent and resources to identify cost savings throughout your entire supply chain. We pair engineering and design optimization with strategic sourcing to allow for lower costs, reduced risk and increased quality.

Deliverable: A detailed overview of your packaging spend and actionable opportunities to reduce costs.

The Adept Advantage

Over 1,500 Combined **Years of Experience**

WHY WE'RE DIFFERENT

We are driven to maximize the value of design, development and engineering services tailored to meet our clients' packaging needs. We differentiate ourselves in a number of ways:

Global Team of 100+ Experts

Experienced team of high-performing professionals with one of the largest teams of packaging-related subject matter experts spanning the US and EU

Diverse Technical Capability

Broad spectrum of expertise in 60+ specialized areas covering all technical needs of a packaging department from concept through commercialization

Industry-Leading Client Base

We have worked with all 10 of the leading global pharmaceutical companies in the world

Market Leader

Unrivaled expertise and industry-leading best practices

Stable Financials

Wholly-owned operations, with a track record of growth since inception

One Tree Planted

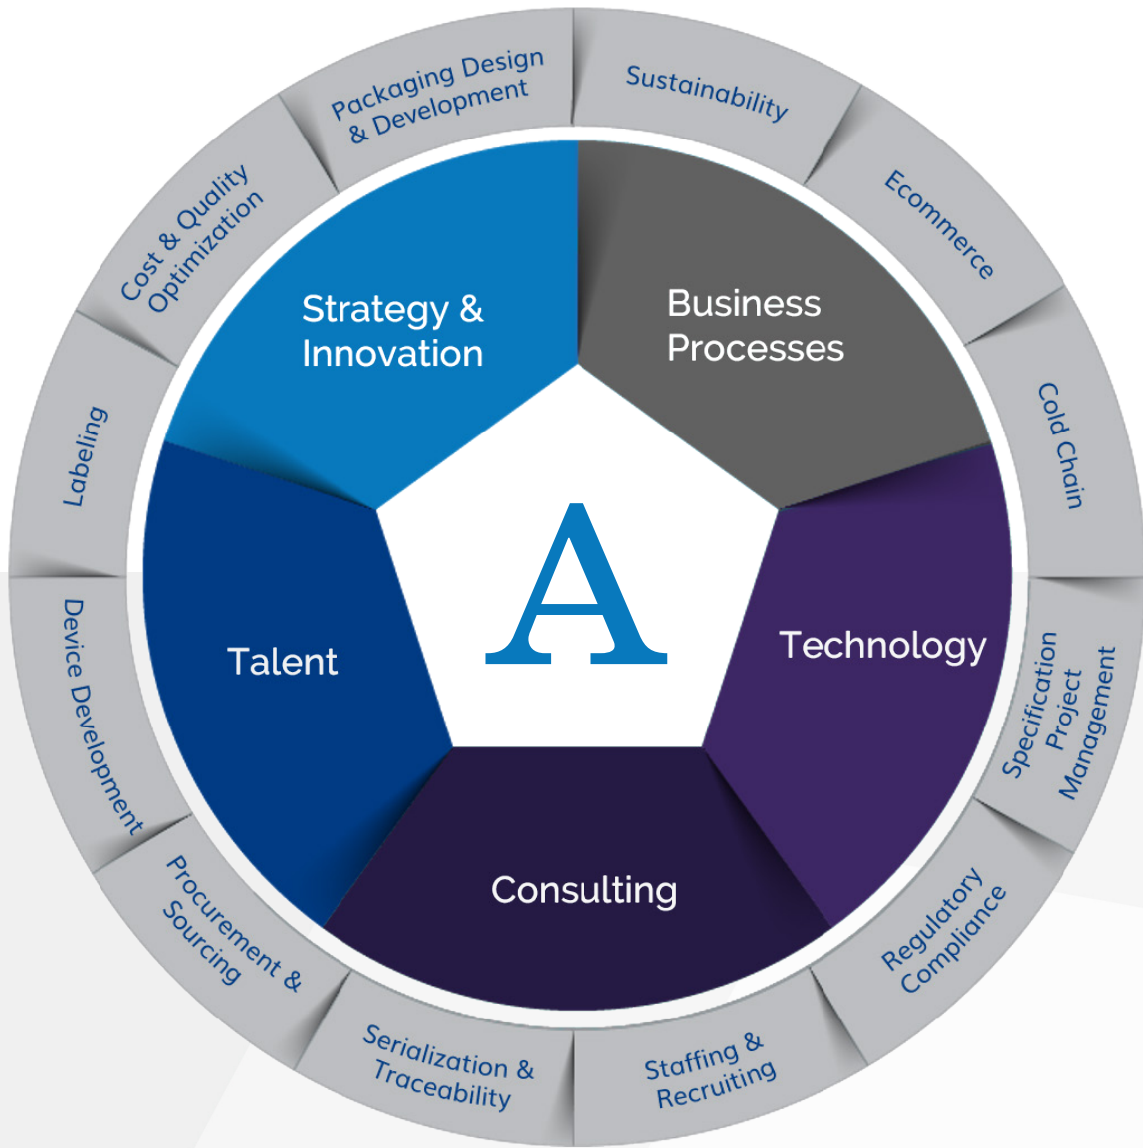

We donate a percentage of each project to help with reforestation efforts across the globe

In 2019, we saved our clients over **\$117,000,000**

Services & Capabilities

Diversity of Expertise

PACKAGING ENGINEERING IS NOT ONE-SIZE-FITS-ALL.

Clients rely on our knowledge of specific regulations, packaging components, materials, formats, and applicable technologies, as well as our understanding of their respective supply chains. Based on their needs, we assemble a team of leading experts to develop solutions tailored to meet their specific goals.

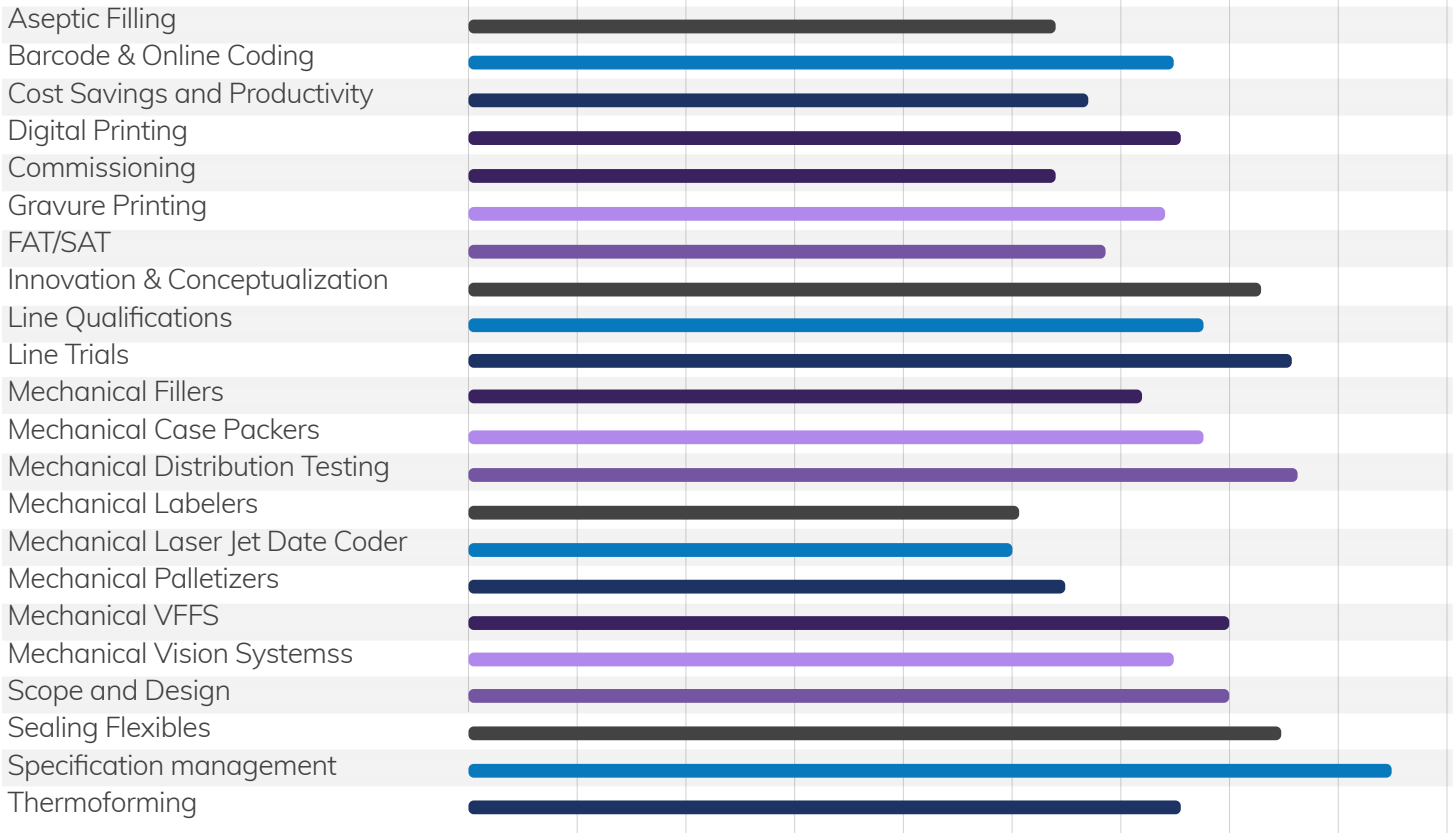

Our services cover all of the core needs of a packaging department, from concept through commercialization, while our capabilities enable remediation, differentiation, and optimization of your entire supply chain.

Team & Expertise Snapshots

Process & Technologies Expertise

Number of Subject Matter Experts

Our Education

- Michigan State
- Rutgers
- Rochester Institute of Technology
- Clemson University
- University of Wisconsin-Stout
- San Jose State University
- California Polytech State University

Multi-Disciplinary Backgrounds

- Packaging Engineering
- Material Science
- Industrial Engineering
- Biomedical Engineering
- Supply Chain Management
- Automation, Engineering Management
- Medical Engineering
- Plastics Engineering
- Device Development
- Regulatory
- Labeling

Enabling Knowledge Expertise

Digital Services

From Management to **Manufacturing**

IMPROVING PACKAGING SYSTEMS

Our technical experts have a strong track record of implementing and optimizing digital packaging solutions to increase consumer safety, reduce risk, increase speed to market and improve the functionality of your packaging system.

“Adept Digital provides technical expertise for serialization, aggregation, labeling and packaging. Adept Packaging feels like an extension of our packaging engineering team. It’s been a good partnership.”

-Javier Gonzalez, Promius Pharma

Our Capabilities

- Digital strategy development and ideation
- Serialization implementation
- Traceability solution implementation
- IT implementation
- Technical assessment (machinery, efficiency, packaging materials, etc.)
- Tech transfer of pharmaceutical products
- Vendor management
- Program optimization
 - Improve Overall Equipment Effectiveness
 - Assess and improve overall operational efficiency

Sustainability

Guiding Your Sustainability Journey

A PHASED APPROACH TO SUSTAINABILITY

We understand the differing needs among organizations when it comes to sustainability. While some need trustworthy technical resources to navigate a rapidly changing regulatory and consumer environment, others are looking to be sustainability pioneers.

Our team has the resources, tools and expertise to guide companies through any stage of their sustainability journey. From taking the first step to becoming a recognized industry leader, Adept has you covered.

Adept Value Optimization

Accelerating Savings **Beyond Sourcing**

IMPROVING YOUR PACKAGING SUPPLY CHAIN

Our team of optimization specialists leverages our best-in-class tools, talent, technology and resources to improve the cost efficiency and quality of your packaging supply chain.

The Three Pillars of Optimization

Operational Strategy

Develop your strategic blueprint for optimization

Market Research

High-performing intelligence that answers critical business questions faster

Implementation

Transform the value of your packaging through insights-based implementation
